

Installing and Configuring Novell Internet Access Server 4.1

Novell® Internet Access Server 4.1, included with NetWare® 4, provides routing between local and Remote LANs (Multiprotocol Router) and allows users to dial in and access the NetWare 4 server using a telephone or ISDN connection from a remote location (NetWare Connect®).

configuration after installation, enter **load NIASCFG** at the server prompt.

PREREQUISITES

- Install NetWare 4.2 on your server.
- Load and configure TCP/IP (load INETCFG for instructions on how to load and configure TCP/IP).

PROCEDURE

1. At the server prompt, enter **load cdrom**.
2. Mount the *Novell Internet Access Server 4.1* CD-ROM as a NetWare volume by entering **cd mount NIAS41** at the server prompt.
3. At the server prompt, enter **load install**.
4. Select *Product Options > Install a product not listed*.
5. Press **F3** and enter **NIAS41:** at the prompt.
6. Press **Enter** to continue the installation.
7. (Conditional) To make changes to your Novell Internet Access Server
